2026-05-7.1 To consider writing to Natural England in support of EDF/Hinkley Point C application for amendment to development consent order re: fish protection measures

EDF have reported that trials of the Acoustic Fish Deterrent system, to prevent fish being drawn into the intake pipes of the new power station, have been very successful. They believe that use of this device, plus other mitigation actions already in progress, will be enough to mitigate any impact on fish populations without having to construct saltmarsh habitat as well. However, Natural England are understood to be pushing for the saltmarsh proposals to go ahead. EDF have asked the council to consider writing to Natural England in support of EDF's view that saltmarsh creation would be excessive.

It was RESOLVED that a letter of support should be sent.
